Assisted Living

Dementia Care to meet unique needs

Assisted Living at the Dementia Care and Education Campus offers personalized care in a small home-like setting for people living with all types and stages of dementia. Our residents feel a sense of community and belonging. Compassionate caregivers assist with daily activities and nurture each person's interests and abilities with art, music, exercise, cooking and more. Doctors, nurses, social workers and dementia educators are always available to meet medication and health needs. Residents enjoy spacious rooms, an onsite chef, housekeeping and salon services, and safe walking paths with lovely views of Camelback Mountain.
